## **DETAILED ACTION**

1. The amendment filed 8/12/08 has been received and considered. Claims 1, 4–6, 11, 14–16, 21, and 24–26 are cancelled. Claims 2, 3, 7–10, 12–13, 17–20, 22, 23, and 27–30 are presented for examination.

### **Examiner's Amendment**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
3. Authorization for this examiner's amendment was given in a telephone interview with Matthew Anderson on 8/27/08.
4. The application has been amended as follows:
5. Claim 29 line 2, immediately after the term "medium," the following has been inserted -- the instructions that when executed perform determining a thickness of a wall of a graphic model, the product --.
6. Examiner notes that claim 29, has been amended to circumvent 101 issues.

**Allowable Subject Matter**

7. Claims 2, 3, 7–10, 12–13, 17–20, 22, 23, and 27–30 are allowed over prior art of record.

8. The following is an examiner's statement of reasons for allowance:

9. While Onodera et al., (Onodera hereinafter), Pre-Grant publication 20040186604, (see PTO-892 Notice of Reference Cited dated 4/19/07) discloses "The face-to-face distance between the two (2) surfaces, which are registered in that pair-surfaces is calculated out, and the internal-surface model data 114 is given with this face-to-face distance between the surfaces, as an attribute of thickness of the target internal-surface model" in page 6, col. 1, paragraph [0065], Balaniuk et al., (Balaniuk hereinafter), Pre-Grant publication 20030088389, (see PTO-892 Notice of Reference Cited dated 5/12/08), discloses a 3D volume meshing internal body topology, tetrahedron-type topology (see col. 26, lines 10–17), and Duane R. Hixon, (Hixon hereinafter), U.S. Patent 7,359,841, (see PTO-892 Notice of Reference Cited dated 5/12/08), discloses a 3D grid mapping internal body topology (see col. 26, lines 10–17)

10. None of the references cited or the art searched disclose or teach alone or in combination the method for determining the thickness of a wall of a graphic model which includes searching for a second element in the surface mesh, guided by the face normal direction; identify a second element in a second wall side of the graphic model; projecting the second element onto a face of a model to identify a projected point; and

determining and storing the distance between the first element and the second element in combination with and in the same relationship to the remaining elements and features of claims 9, 19, and 29.

11. Also, there is no motivation to combine none of the references to meet these limitations. It is for these reasons that applicant's invention defines over the prior art of record.

12. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
